

Ayush Rai

ENGINEER

ABOUT

My name is Ayush, and I recently graduated with Bachelors of Technology in ECE from Reva University, Bengaluru. I am highly adaptable and enjoy staying updated with new trends and technologies in my field. I gained experience in web development and honed my skills as a front-end developer, learning the importance of meeting deadlines and effectively communicating with clients. Yet I recognize that there is still much for me to learn and grow in my profession under professionals.

ACHIEVEMENTS AND EXPERIENCE

- Freelanced as a frontend web developer and worked on several websites using HTML, CSS, Bootstrap and JavaScript, also built several WordPress websites.
- Currently working with a team on a large scale Angular-Dotnet-myoSQL based website. Where I delivered the UI for many components using HTML and bootstrap, provided logic and data-binding using TypeScript and Angular.
